

**Stephen Field**  
**Healthcare Practice Leader**  
**Object Computing, Inc.**

OCI is a St. Louis based software engineering company that has developed mission critical systems for Financial Markets, Defense, Telecommunications and Healthcare for over 15 years. OCI has been on the forefront of delivering Open Source solutions, providing development, maintenance and training for high-performance software components used world-wide. OCI's Healthcare Practice is focused on delivering an open Health Information Exchange solution that can support all stakeholders, and be replicated at low cost.

Steve has led complex systems integration work throughout his long career, including executive leadership positions with Accenture, and two start-up consulting firms. He has invented unique solutions in telecommunications, manufacturing, financial services and media research. Steve began his healthcare industry work leading the Health Information Exchange architecture for a National Health Information Network Prototype.
