

Chris Kryder, M.D.
Chairman & Chief Executive Officer
D2Hawkeye

Chris is a Boston-based physician and entrepreneur. He founded D2Hawkeye in July 2001, with a business plan to combine expertise in medical management with database programming and design, and build data mining tools to facilitate quality improvement and cost management.

Chris earned his B.A. in History from the University of Buffalo, and his M.D. from Georgetown University. He completed his Internal Medicine Residency in Boston (Harvard Primary Care) in 1984, and then earned an M.B.A. from the Sloan School at the Massachusetts Institute of Technology.

After twelve years of medical practice and medical group leadership at MIT in Cambridge, Chris became Chief Medical Officer at several firms, both publicly-traded and privately-held.

Dr. Kryder remains active as a clinical instructor at Harvard Medical School, and is a lecturer on the faculty in the HST Medical Engineering and Medical Physics program at MIT
